### **DETAILED ACTION**

This is a first office action.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Brien (US patent No. 6,058,521).

O'Brien shows and teaches a collapsible structure for holding water, comprising panels (18) being connected together to form a wall (14) and a base panel (12), the wall (14) forming an annular rim member (26) with a central opening (15), a flexible and waterproof material (22) attached to the rim member (26) to form a containing member that defines a side wall with a containing space, wherein the wall (14) is considered including a first, a second, and a third frame members (28) attached to the wall and spaced part from each other (see Fig. 1, panels 18 space apart by panel 20), the base panel (12) has a diameter greater than the diameter of the rim member and the container, and the panels are considered to be positioned along the base.

#### ***Allowable Subject Matter***

3. Claims 5-6 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3636

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. European Patent No. 331,029, Brereton '136 teach a ring member being covered by a collapsible panel as similar to the claimed invention. Breslin et al. '230, Song et al. '149, Miller '131, Gillebarrd, Jr. '702, Counts '508, Chang '386 teach various collapsible structures having a water containing member and a cover attached to the rim of the water containing member as similar to the claimed invention.
